

A Complete System

Ferrofacta provides the hot runner Mono-Block as well as the complete control technology required for your casting production

Hot Runner Mono-Block Module

We design, produce and manufacture the complete hot runner system as a single mono-block module. This includes a full quality inspection and testing procedure prior to delivery.

The customer benefits from ease of assembly and a maintenance friendly design avoids any unfortunate build failures such as electrical faults or possible leakage.

Full technical documentation including wiring diagrams and installation instructions are provided with the system. Full support is provided, ensuring projects are delivered quickly and effectively so that the production benefits are gained immediately.

Hot Runner Technology for Zinc Die Casting

The first and only full hot runner system available for zinc die casting. Patented and revolutionary technology allows direct gating of die cast parts. Sprue-less, finished production with zero waste!

Temperature Controller

Specifically designed for use with the hot runner module

- + Precise and robust temperature control
- + Simple and user friendly operating concept
- + Maximum safety of operation
- + Comprehensive monitoring functions
- + Fast fault finding with built-in diagnostics and help facility
- + Mobile control unit for use across the foundry
- + Service friendly
- + Ideally matched to your zinc hot runner
- + Flexible programming to suit your requirements
- + Possibility of between 8 -128 control circuits
